case study

“We are proud to be the first company in Africa to go live with the full Professional Services suite on SAP S/4 HANA Cloud. The solution has standardised and streamlined our processes according to global best practice and we are confident that we can implement this solution successfully for our clients.”

Jerry Pillay, Britehouse Chief Financial Officer

Why Britehouse strived to implement S4 HANA Public Cloud for themselves

Britehouse felt it necessary to implement Public Cloud in their own environment in order to obtain valuable experience in the field and at the same time benefit from a fully integrated, real-time solution for their business.

Implementing S4 HANA in their own environment, Britehouse aimed to become a trusted partner in the field of SAP S/4 HANA Cloud by implementing the solution in its own environment.

It strived to standardise and streamline processes across its business units to ensure adherence to global best practices.

How the Britehouse SAP Team implemented S4 HANA

The SAP team implemented the Finance and Logistics, Professional Services including Resource Management Modules of SAP S/4 HANA Cloud across all Britehouse’ business units, using SAP Activate project Methodology and Fit-to-Standard processes.

A public cloud SAP S/4 HANA solution to support Finance, Logistics, Resource Management and Professional Services departments.

Fit-to-standard processes based on global SAP best practice. Standardisation of processes across all business divisions.

What the S4 HANA Public Cloud is adding to Britehouse

Learned valuable lessons pertaining to the S/4 HANA Cloud solution which can be leveraged in future implementations at customers. Seamless integration between processes is saving time and improving accuracy and control.

Valuable implementation experience in SAP S/4 HANA Cloud replaced disparate legacy solutions, adoption of integrated best practice processes and created agility for innovation and optimization.

It improved governance and security with near real-time reporting while improving the user experience.
